

WIREFRAMES

Mockups

O QUE É WIREFRAME?

- Um wireframe é uma representação visual simples de uma página ou aplicativo, destacando a estrutura e a disposição dos elementos, sem focar em detalhes de design ou conteúdo. Ele serve como um esboço inicial para planejar a interface do usuário.

EXEMPLO

Placeholder text for the top left section of the desktop layout.

Placeholder text for the top right section of the desktop layout.

Placeholder text for the middle left section of the desktop layout.

Placeholder text for the middle right section of the desktop layout.

Placeholder text for the middle right section of the desktop layout.

Placeholder text for the middle right section of the desktop layout.

Placeholder text for the bottom left section of the desktop layout.

Placeholder text for the bottom left section of the desktop layout.

Placeholder text for the bottom left section of the desktop layout.

Placeholder text for the bottom left section of the desktop layout.

Placeholder text for the bottom left section of the desktop layout.

Placeholder text for the bottom left section of the desktop layout.

Placeholder text for the bottom middle section of the desktop layout.

Placeholder text for the bottom middle section of the desktop layout.

Placeholder text for the bottom middle section of the desktop layout.

Placeholder text for the mobile app mockup.

Placeholder text for the mobile app mockup.

Placeholder text for the bottom middle section of the desktop layout.

Placeholder text for the bottom middle section of the desktop layout.

Placeholder text for the bottom middle section of the desktop layout.

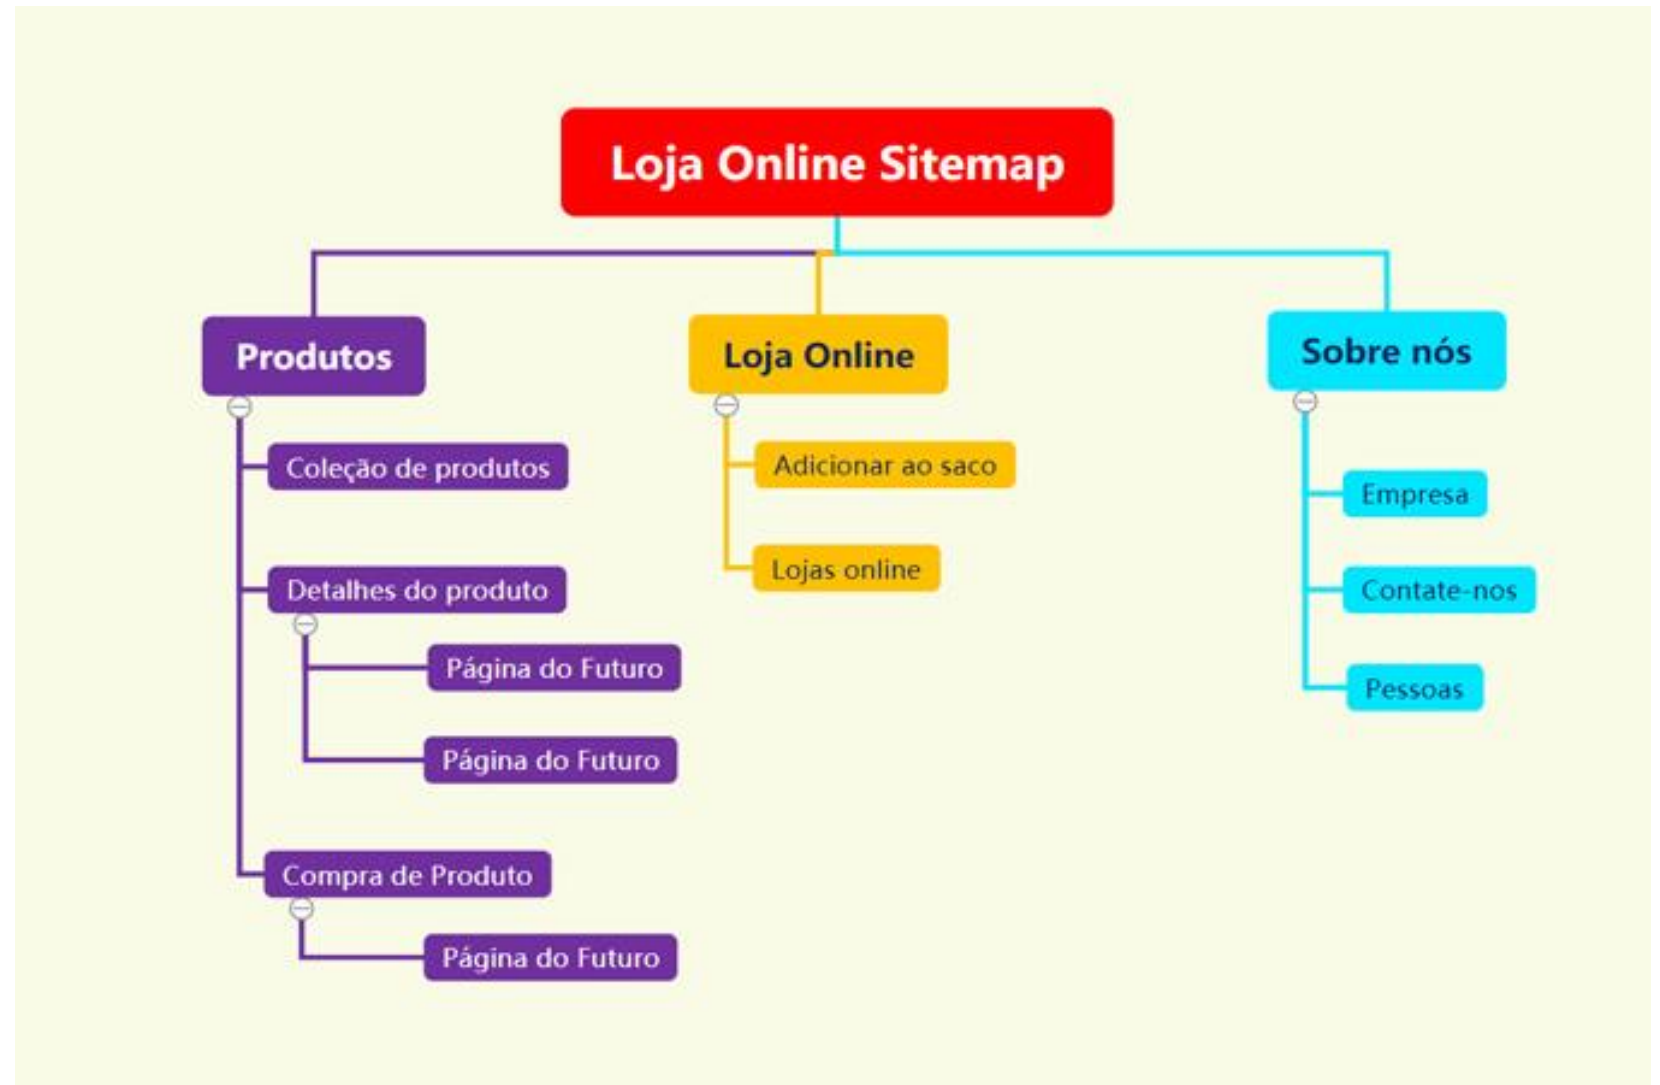

Placeholder text for the bottom middle section of the desktop layout.

O QUE É UM SITEMAP?

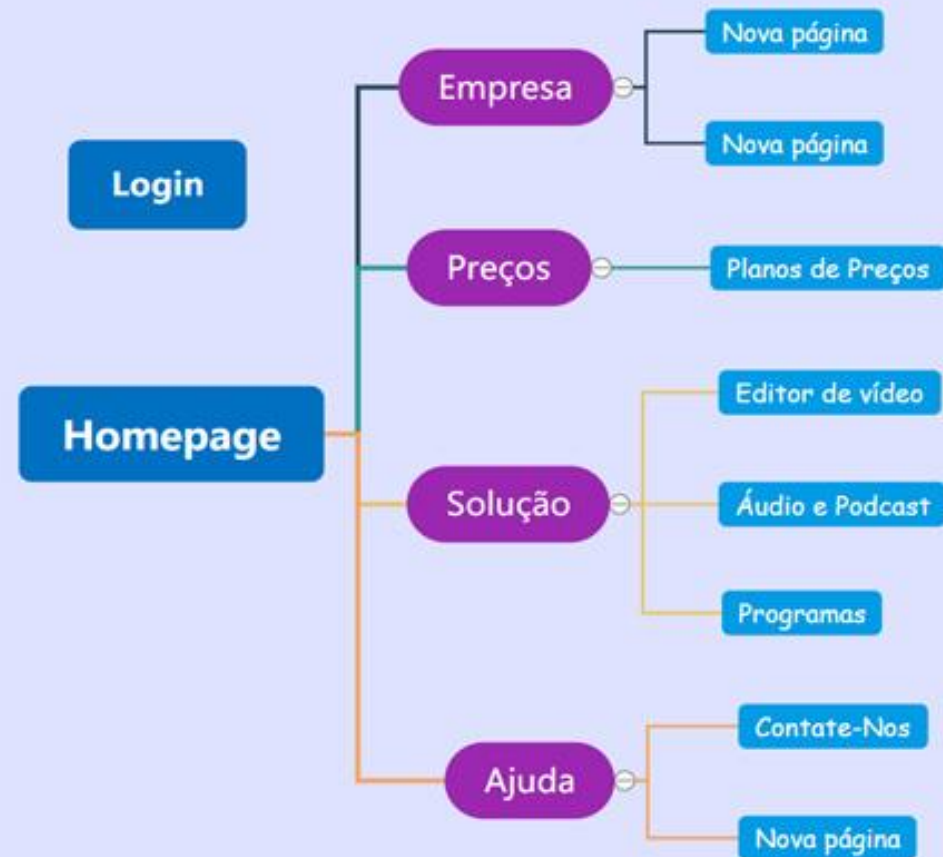

- Um sitemap é uma representação organizada da estrutura de um site, mostrando as principais páginas e a relação entre elas. Ele serve como um guia para organizar e planejar a navegação e o conteúdo de um site.
